

LAFAYETTE COLLEGE

SCHEDULE OF CLASSES FALL 2018

REGISTRATION FOR FALL 2018

Directions for registering online are being emailed to students. A printed copy can also be obtained at the Registrar's Office at 215 Markle Hall. As in previous semesters, students can register in person by returning a completed registration worksheet to Markle Hall on the class registration days listed below.

CLASS OF 2019

April 16 - 7AM Registration online via Banner Self-Service opens
April 16 - 9AM Students may register in person at 215 Markle Hall

CLASS OF 2020

April 18 - 7AM Registration online via Banner Self-Service opens
April 18 - 9AM Students may register in person at 215 Markle Hall

CLASS OF 2021

April 20 - 7AM Registration online via Banner Self-Service opens
April 20 - 9AM Students may register in person at 215 Markle Hall

Students are responsible for meeting class registration procedures and deadlines. Students who register after May 4 will be subject to a \$50 late fee.

COMMON COURSE OF STUDY REQUIREMENTS. Specific course attributes used to complete Common Course of Study (CCS) requirements can be found online using either the Registration/Course Look-up area in Banner Self Service or the Still Needed links in your DegreeWorks audit.

FINAL REGISTRATION. The payment due date for fall 2018 is expected to be in June/July 2018. Official Course Schedules will be emailed to all students on or about August 21, 2018. Schedules will be released only if

all fees and charges are paid. Students with unpaid fees, charges, etc., must make satisfactory financial arrangements with the Controller's Office in order to receive their class schedule.

FALL CLASSES WILL BEGIN ON AUGUST 27, 2018. Students who fail to register for the fall 2018 semester and who do not report to College within the first two weeks by September 7, 2018 will be regarded as resigned and must apply to the Dean of the College if they wish to return.

WAIT-LIST, DROP/ADD. Wait-listed courses will be recorded as WW or WL on the schedule. Your adviser and instructor or department head must approve acceptance for wait-listed courses by drop/add procedure. Students may drop/add following the registration period only by adviser and instructor approval up until the two-week deadline of September 7, 2018. Wait-listing yourself in multiple sections of the same course does not increase your chance of being accepted into the course. You should only wait-list yourself for a section that fits your schedule.

ADDRESS CHANGES. It is the student's responsibility to keep the Registrar's Office informed of permanent home address and phone numbers. The Registrar must receive address changes in writing.

PRIVACY INFORMATION. Each student has the right to limit the access of off-campus parties, excluding government agencies in certain situations, to information that would normally be released in the College Telephone and E-mail Directory or athletic programs. Students who wish to take advantage of this right may do so by making the request in the Registrar's Office.

Notification of Rights under FERPA-The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are: (1) The right to inspect and review the student's education records. (2) The right to request the amendment of the student's education records to ensure that they are not inaccurate, misleading, or otherwise in violation of the student's privacy or other rights. (3) The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. (4) The right to file with the U.S. Department of Education a complaint concerning alleged failures by Lafayette College to comply with the requirements of FERPA. (5) The right to obtain a copy of Lafayette College's student records policy. You can obtain a copy of the policy from the Registrar's Office.

VOTER REGISTRATION INFORMATION. Students are encouraged to register to vote. Information concerning applications and procedures for all states are available via the Registrar's Office home page at <http://registrar.lafayette.edu/additional-resources/voter-registration>

REGISTRATION PROCEDURES TO BE USED BY ALL CLASSES

1. Make an appointment with your adviser to review course programs and to seek his or her approval of course registration selections. If registering online, you will need to obtain your alternate/registration PIN number from your faculty adviser. If registering in person, the fall 2018 registration worksheet must be approved and signed by the faculty adviser and returned within the designated times for your class.

Forged signatures will subject student to disciplinary action. In such cases, registration will be cancelled.

2. Select a normal course load of four courses exclusive of Military Science and 0.25/0.50 credit courses. Be sure to avoid conflicts. In case of conflicts, required major courses will take preference in scheduling. Be sure to select at least one or two alternate courses in case a preferred course is closed.

3. Register for courses by using the complete CRN number as listed on the course and hour schedule, including when needed, lectures and laboratories/quizzes.

Original preferred sections are not final and will be subject to change within constraints of optimal enrollment balance, laboratory space and to accommodate the usual departmental changes in section additions or cancellations. Schedules also may have to be altered to resolve conflicts or use of alternate courses to replace closed options.

If participating in fall sports, efforts will be made to minimize late afternoon, evening scheduling.

CLOSED COURSES

Occasionally, it may be necessary to close a course to maintain optimal enrollment limits set by departments. In such cases, courses are normally filled by class seniority on a first-come, first-served basis. However, in certain courses an assigned number of spaces are reserved for each class. If a course is closed, first consider one of your alternate courses. If you wish to be added to the course wait-list, follow the online registration procedures for wait-listing or, if registering in-person, inform the clerk who will assist you. If space is available at the start of the semester you must register by drop/add procedure.

SPECIAL PREREQUISITES

Students should carefully check course prerequisites as stated in the catalog. Refer to the Course and Hour Schedule for courses that designate consent by instructor or department head and require the signature of the appropriate person. This person should sign the registration worksheet in the course authorization column.

Students who wish to be considered for part-time registration status must submit petition to Registrar's Office by August 1, 2018.

OFF-CAMPUS STUDY ABROAD

Students who intend to study abroad next semester or enroll in Lafayette affiliated off-campus programs in the U.S. should be sure to submit the required course approval petition by the deadline set by the

International and Off-Campus Education office. For all off-campus study, Academic Progress Committee petitions with prior course approval must be filed with the Registrar.

PASS/FAIL / AUDIT OPTIONS

Eligibility - Juniors and Seniors in good standing whose cumulative GPA is 2.00 or higher may, in each semester, take one course on a Pass/Fail basis. A Pass grade (A through D-) does not affect the student GPA, but an "F" grade does count in the GPA. (See the Lafayette College Catalog online for details and restrictions.)

Procedure - Students must seek approval of the Academic Progress Committee by the petition procedure to take a course for P/F credit. The petition must be pre-approved by major adviser with reasons clearly stated and be submitted no later than the end of the two week drop/add period.

Audit - An audit must be declared no later than the end of the two-week drop/add period. Permission must be granted by the Academic Progress Committee through the petition procedure and with the approval of the instructor and the academic adviser or the head of the department in which the course is offered. No credit will be granted, but if audit conditions are met the course will be appended to the permanent record.

CROSS REGISTRATION

Information on LVAIC schedules and calendar dates are available in the Registrar's Office. A full-time Lafayette day student may cross register for a course suitable to Lafayette degree programs, which cannot be scheduled at Lafayette. Courses are available at any one of the other member institutions of the Lehigh Valley Association of Independent Colleges (LVAIC), Cedar Crest College, DeSales University, Lehigh University, Moravian College and Muhlenberg College, provided the student has approval of faculty adviser, the Lafayette Registrar, and the appropriate persons at the host institution, and provided such course does not produce an overload. Grades will be accepted from the LVAIC institutions. Credits taken through cross registration will be accepted toward Lafayette residency requirements.

CALENDAR DATES FOR 2018 FALL TERM & 2019 INTERIM SESSION.

Aug 1, 2018	Deadline for graduating seniors to petition for part-time registration status
Aug 27, 2018	Classes begin
Sept 7, 2018	Deadline for adding & dropping courses, conversion to pass/fail, audit declaration
Oct 8-9, 2018	Fall Break
Oct 19, 2018	Mid-term grades due
Nov 5-16, 2018	Preregistration for spring 2018 semester
Nov 14, 2018	Last day to withdraw from classes without penalty
Dec 7, 2018	Last day of classes
Dec 11-18, 2018	Final exam period
Dec 21, 2018	Final grades due at 12 Noon
Jan 7-25, 2019	Interim session

COURSE LOAD

For A.B. and B.S. Science students, the normal course load is three or four courses; for B.S. Engineering students between three and five courses. Additional courses constitute an overload and will not be accepted during the registration period. Students may seek approval to register for overload courses on a space available basis after the initial registration period only by approval of the Academic Progress Committee through the petition procedure. Previous academic history is a factor in reviewing overload requests. Requests may be submitted after April 10, but are normally not reviewed until after final grades are published. Overload petitions will not be accepted with original registration.

COURSE NUMBERS

100-Level Introductory or fundamental courses: usually first course in department open to first-year students.

200-Level Intermediate level courses which are normally open to first and second year students following the first level sequence and may have prerequisites: sophomore engineering courses normally not open to first-year students; courses open to students who have completed one year of college work or equivalent in the subject.

300-Level Advanced-level courses which have prerequisites: normally open to juniors and seniors, Internships, Independent Study and Special Topics open only by permission of departmental chairman.

400-Level Senior level or courses that have 300-level courses as prerequisites, thesis courses open only to honors candidates.

NOTE: Class availability, times and room assignments are subject to change. Corrections and updates to the course & hour listing can be found on the Registrar's Office home page at registrar.lafayette.edu

Original preferred sections are not final and will be subject to change within constraints of optimal enrollment balance, laboratory space and to accommodate the usual departmental changes in section additions or cancellations. Schedules also may have to be altered to resolve conflicts or use of alternate courses to replace closed options.

Course hours are listed in military time, i.e. 1300 = 1PM, 1400 = 2PM, etc.

2018 FALL COURSE AND HOUR SUPPLEMENT

INCLUDES INFORMATION RECEIVED FROM DEPARTMENTS THROUGH MARCH 1, 2018

All changes pending faculty approval.

A&S 275 - Gender and Family in Modern and Contemporary Japan

We will explore anthropological research on gender and the creation of the family in Japan, with an emphasis on the modern and contemporary eras. Utilizing readings and documentary film, weekly units trace individuals and families throughout the life course, from birth and childhood, to partnering, childbirth and childrearing, adulthood and aging. Investigation of critical issues in Japanese society will serve as means to develop sustained engagement with anthropological inquiry and East Asian studies.

ART 272 - Special Topics: Documentary Photography

This course asks students to delve into the context and 'story' behind documentary photographs. Students will learn to look beyond the surface and investigate the framework in which documentary images are created thinking about how we "read" an image within the historical and cultural context. Through research and collaborative investigation, students will pursue documentary projects that take them into the community to photograph and learn about the people, place, and community surrounding their subject matter.

BIOL 233 - Environmental Problem Solving in Biology

This course explores environmental issues using an applied ecology perspective. It emphasizes biological dynamics of human populations and our impact on local, regional and global ecosystems. Topics are multidisciplinary and problem-based learning is emphasized with biological approaches. We review ecological principles in human ecosystems, then explore topics such as environmental public health, ecological risk assessment, exposure to toxicants in the environment, wildlife regulation and management and technology's role in finding solutions to food production.

BIOL 279 - Quantitative Biology

This course provides an introduction of quantitative reasoning to biologists. Topics include data organization, experimental design, statistical inference, data visualization, bioinformatics, modeling and simulation. All content will be illustrated by biological examples and data sets. Learning how to use the statistical software package R will be a key component of the course.

CLSS 123 - Roman Military and Warfare

This course explores the Roman military and its conflicts, equipment, and tactics through analyses of literary accounts of contemporary historians, generals, and soldiers. The chronology spans the mid-Republic through the late Empire, emphasizing key conflicts including the Punic Wars, Caesar's Gallic campaign, the Jewish War, and the Gallic and Persian campaigns of Constantinus II and Julian. These writings, supplemented with secondary sources, will trace the rise and decline of the most powerful military in antiquity.

CS 416 - Knowledge and Strategy

This course is an introduction of interactive epistemology and game theory, a mathematical theory of conflict and cooperation between rational agents, with emphasis on knowledge and multi-agent systems. The

course also provides an overview of other topics at the intersection of theoretical computer science and economics, such as agreement, common knowledge, mechanism design and auctions.

ECON 408 - Cost-Benefit Analysis

This course connects economic theory with policy analysis using the tool of "cost-benefit analysis." The goal of a cost-benefit analysis is to measure a project's economic efficiency by providing a formal description of the associated costs and benefits. In particular, we will explore different non-market valuation methods to evaluate the costs and benefits associated with environmental projects. This course will provide you with the theoretical background and practical skills required to critically assess a cost-benefit analysis and to perform your own cost-benefit analysis.

ME 395 - Special Topics: Environmental Fluid Mechanics

This course will cover a range of topics related to fluid flows in environmental systems. Material will include pollution transport, dispersion, turbulent mixing, atmospheric boundary layers, plumes, hydrology, waves, and stratification. Students will be introduced to computational and analytical techniques to solve real-world problems in environmental science and engineering specifically relating to air and water flows, such as plume dispersion modeling, land-use regression, and scaling analysis.

PHIL 371 - Knowledge, Power, and Justice

This course is an examination of some of the many ways in which what we know, and what knowledge we are able to share with others, are shaped by individual, structural, and institutional power relations. We hope to discover the conditions of epistemic justice and means for making knowledge acquisition and knowledge transmission more equitable. Readings will include books by Miranda Fricker and José Medina and others' commentary, criticism, development, and application of their accounts. Throughout, we will explore the implications of epistemic injustice for social inequality, democratic institutions, and individual flourishing.

PSYC 223 - Physiological Psychology

Physiological Psychology is the branch of neuroscience concerned with the physiological mechanisms that govern behavior. It is an interface between neuroscience and psychology which is directed toward understanding how the structure and function of the brain (neuroscience) relates to behavior, thought, and emotion (psychology). In this introductory course we will examine the anatomy and physiology which underlies behavior.

THTR 273 - Writing for Performance

Writing for Performance introduces students to writing for theater, media, and film, and offers them intensive practice composing texts that function within the conventions and boundaries of each genre. Students will compose multiple texts in drafts, meet with practicing writers, attend performances, revise, film, and perform original scenes.
